

# dallas key facts

2022

Dr. Kaitlin Batley and patient Cade Crawford at our Dallas campus.

## our mission: **make life better for children**

Since our humble beginnings in 1913 as the first free “baby camp” in the Southwest, an open-air tent hospital dedicated to the care of babies, we have maintained a commitment to our community that includes not only high-quality patient care but also advocacy, education and preventive care with an unwavering focus on our mission. Children's Health has grown to become the only academic health care system in North Texas dedicated exclusively to the care of children from birth to adulthood through our 60-year affiliation with the acclaimed UT Southwestern Medical Center. Working together, we are pioneering research and breakthroughs in pediatric cancer, heart and liver disease, organ transplantation, cerebrovascular disease, regenerative medicine and metabolic disease.

**Today, children facing complex medical conditions travel from all over the world to visit our Dallas campus,** which includes Children's Medical Center Dallas, our flagship hospital and one of the top pediatric treatment centers in the nation.
