

Children's Health<sup>SM</sup>

# 2022 key facts

Dr. Claudia Phen and patient Kason Giddiens at our Dallas campus.

## our mission: **make life better for children**

For more than 100 years, our mission has been to make life better for children. Since our humble beginnings in 1913 as the first free “baby camp” in the Southwest, an open-air tent hospital dedicated to the care of babies, we have maintained a commitment to our community that includes not only high-quality patient care but also advocacy, education and preventive care with an unwavering focus on our mission.

**Children's Health<sup>SM</sup> is the leading pediatric health care system in North Texas and one of the largest pediatric health care providers in the nation.** A private, not-for-profit organization, Children's Health is anchored by two full-service hospitals. The system includes an extensive network offering specialty, urgent, primary and virtual care, as well as much more, to the children of North Texas and beyond. In addition, Children's Health is the official pediatric teaching hospital for UT Southwestern Medical Center's medical school, providing access to its world-renowned medical faculty and transformative biomedical research.

\* 294 sites are funded and administrated by the Texas Child Mental Health Care Consortium and in collaboration with UT Southwestern

**Children's Health PM Pediatric Urgent Care:** seven pediatric urgent care facilities operated by PM Pediatric Urgent Care

## continuing our excellence, preparing for tomorrow

In 2019, Children's Health and UT Southwestern announced the creation of a joint pediatric enterprise, an affiliation agreement solidifying our promise to deliver a brighter, healthier future for children in North Texas and beyond. Together, building upon our 60-year partnership, we continue to combine our respective strengths to transform the pediatric care experience through unrivaled, nationally recognized and academically backed patient care, research and education.

In 2021, the first joint strategic plan was developed for the joint pediatric enterprise, outlining our collective roadmap to making life better for children for many generations to come. We will do this by investing in innovation and clinical program excellence, delivering an unparalleled consumer experience, growing alongside North Texas, and improving, expanding and uniting our physician network.

Our singular focus on children makes us the very best at transformative pediatric medicine, and together we will provide family-centered, compassionate patient experiences designed entirely around the child.
